| N. of companies | 44 COMPANIES ASSOCIATED |
| WHICH KIND OF OPERATORS WOULD YOU MEET?: Architects, Interior Designer, Artists, Gallery, Builders | |

The Association Artigianart Pietrasanta was established in order to promote, safeguard and increase this precious productive system, with its unique features.

The main purpose is to promote the training of specialized staff through training courses; facilitating individual companies - many of which are family enterprises - to handle with less difficulty the impact of considerable costs, in terms of both time and material, of long years of apprenticeship.

A crucial factor to achieve this goal is the development of awareness of the public administration at every level. A further goal is that of involving member companies in shared promotional initiatives, giving greater visibility to local craftsmanship both in Italy and around the world, and calling the attention of the markets to the high quality of our products and to the versatility of what we like to call the “Pietrasanta System”. We look towards creating synergies with other local fields of business, such as the stone industry and the tourism and hotel industries, in order to provide our clientele with the best services possible.
